NOURAH ALOTAIBI

Computer Engineering Graduate | Kuwait | +965 55521992 | nourahalotaibi.kwt@gmail.com

PROFESSIONAL SUMMARY

Highly motivated Computer Engineering graduate from the American University of the Middle East (AUM) with a GPA of 3.89. Skilled in software development, computer vision, cybersecurity, networking, and FPGA design. Experienced in developing software and engineering projects using modern technologies and programming tools. Passionate about problem-solving, learning new technologies, and working in dynamic engineering environments.

EDUCATION

American University of the Middle East (AUM) – Kuwait
B.Sc. in Computer Engineering 2026
GPA: 3.894 / 4.0

TECHNICAL SKILLS

Python | Java | C | VHDL | Linux | SQL |MATLAB | Microsoft Excel | Cybersecurity Fundamentals

ACADEMIC PROJECTS

AI Attendance System using Face Recognition (Graduation project)-Developed an AI-based attendance system using face recognition technology. Implemented real-time entry and exit tracking with automated attendance management.
Hospital Management System – Developed a Java-based hospital management system with role-based functionalities.
Cinema Ticket Booking System – Developed a Python-based cinema booking system using OOP and file handling.
IPC Named Pipes Project – Implemented IPC using C, pthreads, semaphores, and FIFOs.
Smart Stick for the Visually Impaired – Developed an Arduino-based obstacle detection system using ultrasonic sensors, buzzer, and LED alerts.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate – Google / Coursera
- Introduction to Artificial Intelligence (AI) – IBM
- AI for App Building – Google
- Introduction to Networking and Cloud Computing – Microsoft
- Introduction to Computers and Operating Systems and Security– Microsoft

LANGUAGES

Arabic – Native | English – Fluent
